

5 Easy Steps to Upgrade to a Heat Pump

Step 1. Call (888) 333-7525

Call CET to schedule your free 30-minute consultation!

Step 2. Initial Consult

Talk with a Heat Pump Specialist from CET to discuss your project, ask questions about the technology, and create a roadmap for making the switch.

Step 3. Schedule a Home Energy Audit

To identify weatherization opportunities and ensure the heat pumps are properly sized, CET conducts a free home energy audit and energy load calculation. SELCO requires a home energy audit to be eligible for a rebate.

Step 4. Contractor Design Review

CET reviews the contractor design to determine that the sizing aligns with your home's energy load and is eligible for rebates from your light department.

Step 5. Post-Installation Quality Assurance Check

After installation, your Heat Pump Specialist will conduct a virtual quality control check to ensure the system specifications meet those of the approved design. Once approved, you can apply for a rebate.
